

Thursday 18<sup>th</sup> June

**Remember – Keep playing Spelling Shed!**

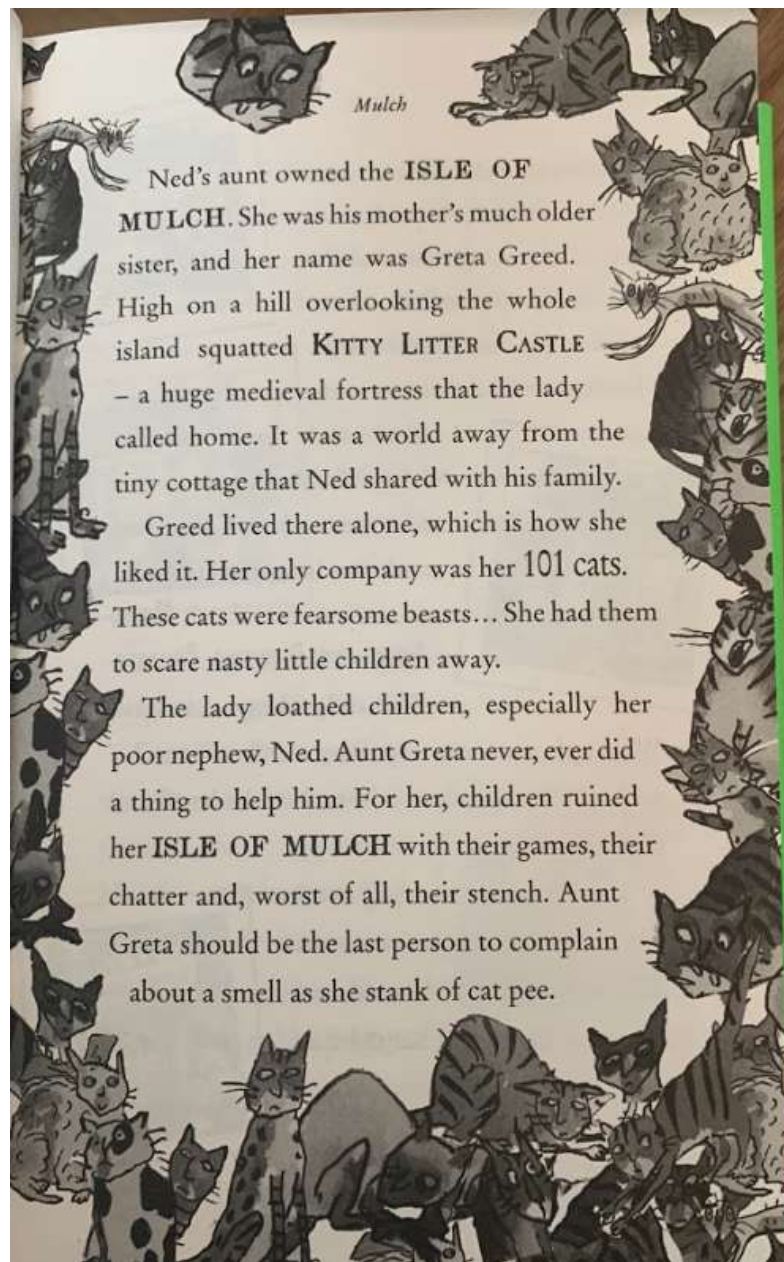

**Hive Games tomorrow.**

**1<sup>st</sup> code at 9:45am for a 10am game.**

**2<sup>nd</sup> code at 11:45am for a 12pm game.**

### **Reading Activity**

Please summarise the next page of Slime.

## **PE**

Try this great activity called 'Dodge the Monsters' on YouTube.

<https://www.youtube.com/watch?v=toi50kBcLM8>

Thank you for the idea Ronnie!

Dance along to High Hopes.

<https://www.youtube.com/watch?v=Ohga4SS1xOc>

## **Music**

Sing along to one of our favourite songs! Hope you remember the words.

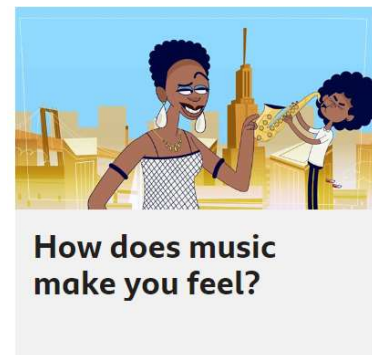

<https://www.youtube.com/watch?v=gf2xOrsOMG8>

The song 'Rise' gives us a range of emotions. We feel happy as we remember singing along with you but also sad as we wish we could be in class singing as loud as we can!

Watch this BBC clip which explains how music can change the mood of a song.

<https://www.bbc.co.uk/bitesize/topics/zcbkcj6/articles/zc7m7p3>

You may also watch Week 7 of the BYMT videos on our Google Classroom.

## **Afternoon Activities – RE**

Our final RE topic of the year is – Why should we care for our world?

The world is a wonderful and amazing place, you might have lots of questions about the world, like...

- Why do bees have stripes?
- Why does it look like the clouds are moving?
- How does thunder make such a loud noise?

Write down any questions you may have. You could use the internet to try and find answers to your questions.

We need to look after our world, look at this website which has sliders on photos to show you how the world is changing.

<https://www.worldwildlife.org/pages/why-we-must-take-care-of-our-planet>

**Five basic needs of human beings from the environment are oxygen, water, food, shelter and warmth.**

We get these from the planet on which we live.

- We breathe oxygen from the air
- We get water from the rain which fills our lakes, rivers and creeks and which we store in dams, reservoirs and water tanks.
- We get food from the plants, animals, fish and birds.
- We get shelter from the materials we take out of the earth and from plants that grow in the earth (trees) to make our homes.
- We get warmth from the sun, fire, power (electricity, gas, oil) and our clothing.

Apart from warmth and light from the sun, these all come from our planet.

But over the years the human population has grown and grown. This has had a huge impact on the environment of our planet.

This impact has caused changes which have affected our atmosphere

- by polluting it (too much smoke, carbon dioxide and other 'green house gases' such as methane),
- by making holes in the ozone layer which protects us from some harmful rays of the sun

Everything living on the earth has basic needs. Humans have caused so many changes that many living things cannot get what they need. Some of the changes have led to the extinction of many kinds of wildlife (animals, plants, insects, etc).

We are going to look at ways we can help to protect and look after our world. Let's start by looking at recycling. Watch this BBC clip which tells us about recycling. <https://www.bbc.co.uk/bitesize/clips/z9p9j6f>

Play this recycling game to sort the items into the correct bins.

<https://www.turtlediary.com/game/recycling-waste.html>

Create a poster on Purple Mash about recycling. We have set you a **2Do** for this.

## Joke for the day

I'm going to start a new recycling centre for chewing gum...

I just need some help getting it off the ground!
